Introduction

Le titre "Ils ont tué mon village" évoque une tragédie qui dépasse la simple perte d'un lieu géographique ; il incarne une blessure collective, une fracture dans le tissu social, et un symbole de la violence qui peut ronger une communauté. Ce récit, qui a été popularisé par le livre de l'auteure cambodgienne Loung Ung, témoigne des ravages de la guerre, de la brutalité des régimes autoritaires, et de la résilience des populations face à l'adversité. Le cas emblématique du Cambodge : "le village comme cible"

Le régime khmer rouge (1975-1979) a marqué l'histoire par sa politique de purification et de transformation radicale de la société. Selon le tribunal spécial pour le Cambodge, des milliers de villages ont été détruits ou purgés, souvent par la violence extrême.

In this comprehensive guide, we delve into the origins, history, ecological impact, and modern-day fascination surrounding Tignes Mon Village Englouti.

The Origins of Tignes Mon Village Englouti

Historical Background

In the early 1900s, France was on a quest to harness hydroelectric power to support its burgeoning industries and rural electrification. The Tignes valley, with its abundant mountain streams and potential for hydroelectric generation, was identified as an ideal site. The construction of the Tignes Dam in the 1950s involved flooding parts of the valley, including the original village of Tignes.

Key Points:

- The project aimed to provide renewable energy for the region and beyond.
- The original village was located at an elevation of approximately 1,400 meters.
- Several homes, farms, and communal buildings were dismantled or abandoned before flooding.

The Flooding Process

The process of creating the Tignes reservoir was meticulous and controversial. It involved:

- Relocation of residents: A handful of families were moved to new villages or different parts of the valley.
- Construction of the dam: A concrete arch dam was built, which began flooding the valley in the early 1960s.
- Gradual flooding: Over several years, the water level rose, and the village slowly disappeared beneath the surface.

- The dam spans approximately 180 meters in length and 60 meters in height.
- It has a capacity of roughly 90 million cubic meters of water.
- The project required the relocation of existing infrastructure and careful planning to balance ecological impact.

Ecological Impact

Flooding the valley transformed the local ecosystem:

- Aquatic habitats: The reservoir now supports diverse fish populations, including trout and pike.
- Wildlife: Terrestrial animals adapted to the new environment, with some species thriving around the lake.
- Environmental considerations: The flooding altered natural water flow and impacted previous land use.

Contemporary ecological assessments focus on balancing hydroelectric needs with environmental preservation, ensuring the sustainability of the region's natural beauty.
